Destiny

The Honorable Joel T. Brayhill
House of Representatives
Washington 25, D. C.

Dear Mr. Brayhill:

I have your letter of September 4, 1959, requesting additional information with respect to postal facilities in our new headquarters building.

At the present time our needs for stamp metering service are met by one machine. We find it necessary to take this meter to the Post Office only once each three months for the purpose of having it reset. We feel that the volume of business handled by the metering machine will be the same when we move into the new building as it is now.

As you know from previous correspondence we have been considering for quite some time the possibility of providing for some commercial facilities on our building site for use by our employees. Up to the present we have not found it feasible to do this but I assure you that if such facilities can be provided we will certainly consider the inclusion of some kind of post office sub-station.

We appreciate your interest in this matter.

Sincerely,

L. K. White
Deputy Director
